These Figures and Trends Define the Mobile Game Market in 2025

Mobile gaming remains one of the most competitive and creatively diverse categories in the app economy – but understanding what drives success takes more than a glance at app store charts. In this report, **we analyze the top 1,000 earning mobile games** using a refined genre and subgenre

taxonomy to map the current structure of a market **where Mid-Core titles dominate**, with RPG genre titles leading the pack. We also examine **how IP collaborations drive meaningful revenue lifts, which ad networks are most prevalent among top games**, and insights such as **how the largest**

non-game apps are increasingly sharing users with hit titles. Finally, we spotlight the markets where **the next wave of mobile game growth is already taking shape**. But first, we'll start with a fresh examination of the mobile games market based on Appfigures data. Let's dive in.

01

The Mobile Games Market in Numbers

How large is the modern mobile game market? The simple answer is "very"—but the figures supporting that fact are contained in this first section of our report.

You'll also find other key insights and metrics, such as top markets for consumer spending, alongside measurements that show which year's releases are generating the most revenue, how many games are launching annually, and more.

2024

Top Markets by Consumer Spending App Store & Google Play

02

The Competitive Landscape

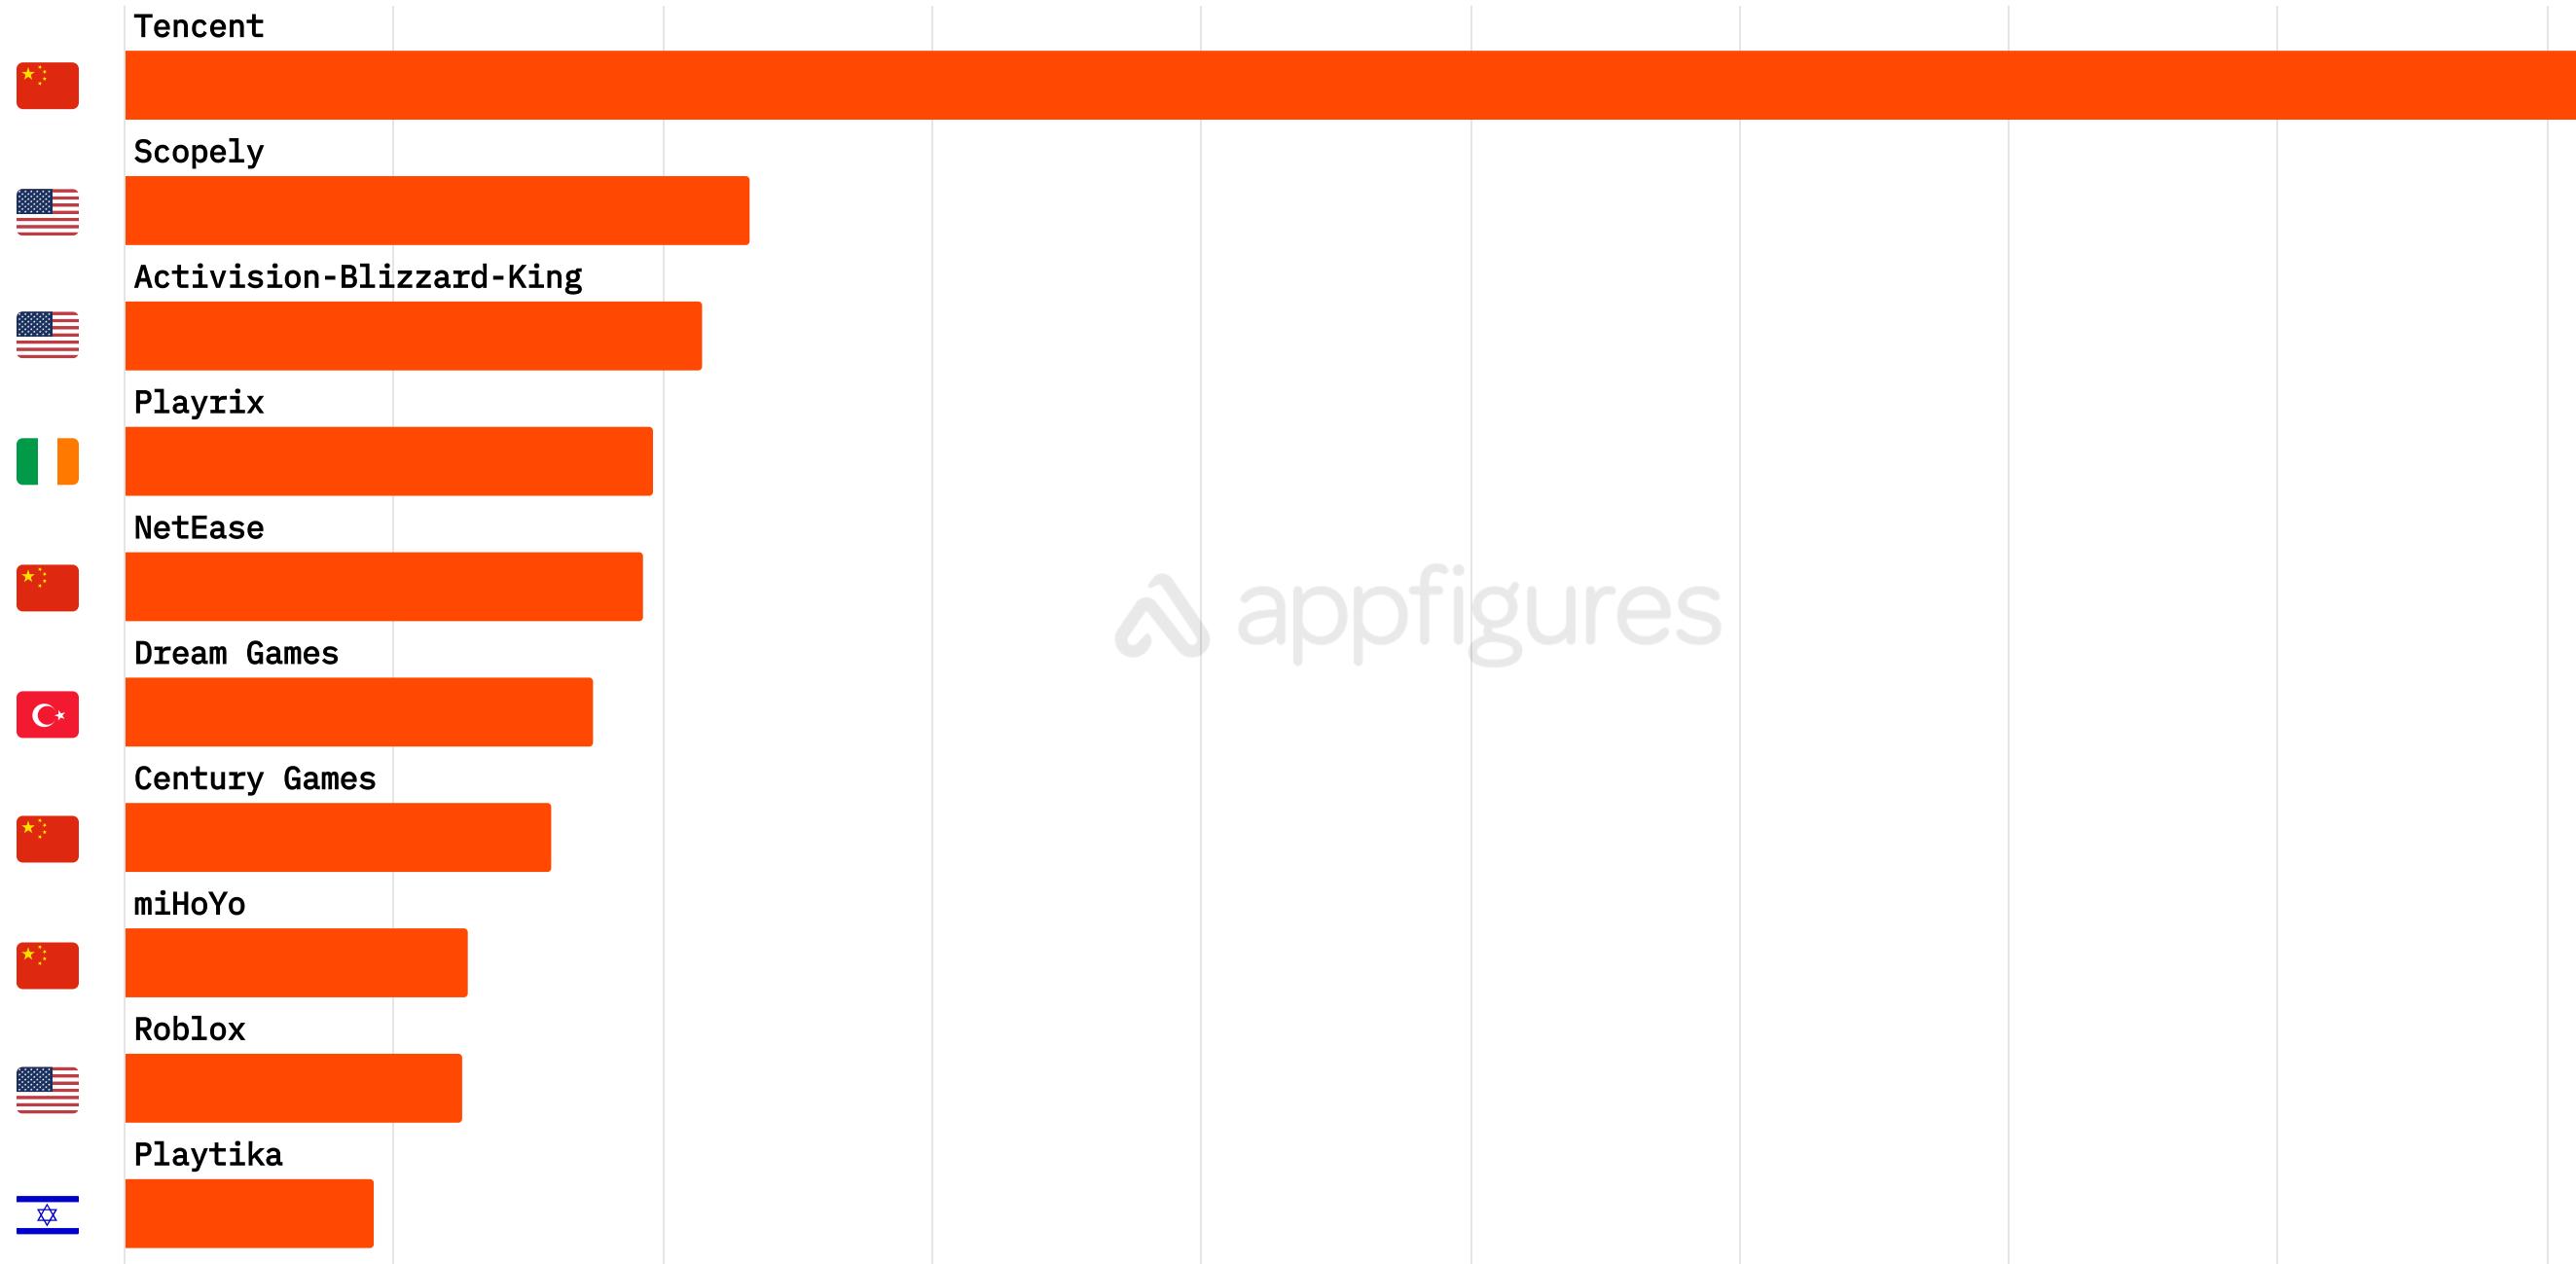

Who's at the top? Which types of games are dominating the charts? What do today's players want — and who's meeting their needs?

For answers, we look to the latest full-year, worldwide rankings for 2024. To set the stage, it's important to know which games — and the companies who've made them — are doing everything right.

03

What Today's Mobile Gamers Are Playing

As our market overview showed, mobile games released in 2022 brought in the greatest revenue among the top 1K titles last year — but what about more recent titles designed and marketed for consumers in 2024-2025?

We'll take a look at those next, along with an exploration of 2024's best performing categories, genres, and subgenres to pinpoint emerging opportunities in an evolving market driven by player preference.

Titles from China and Japan Dominate New Release Revenue

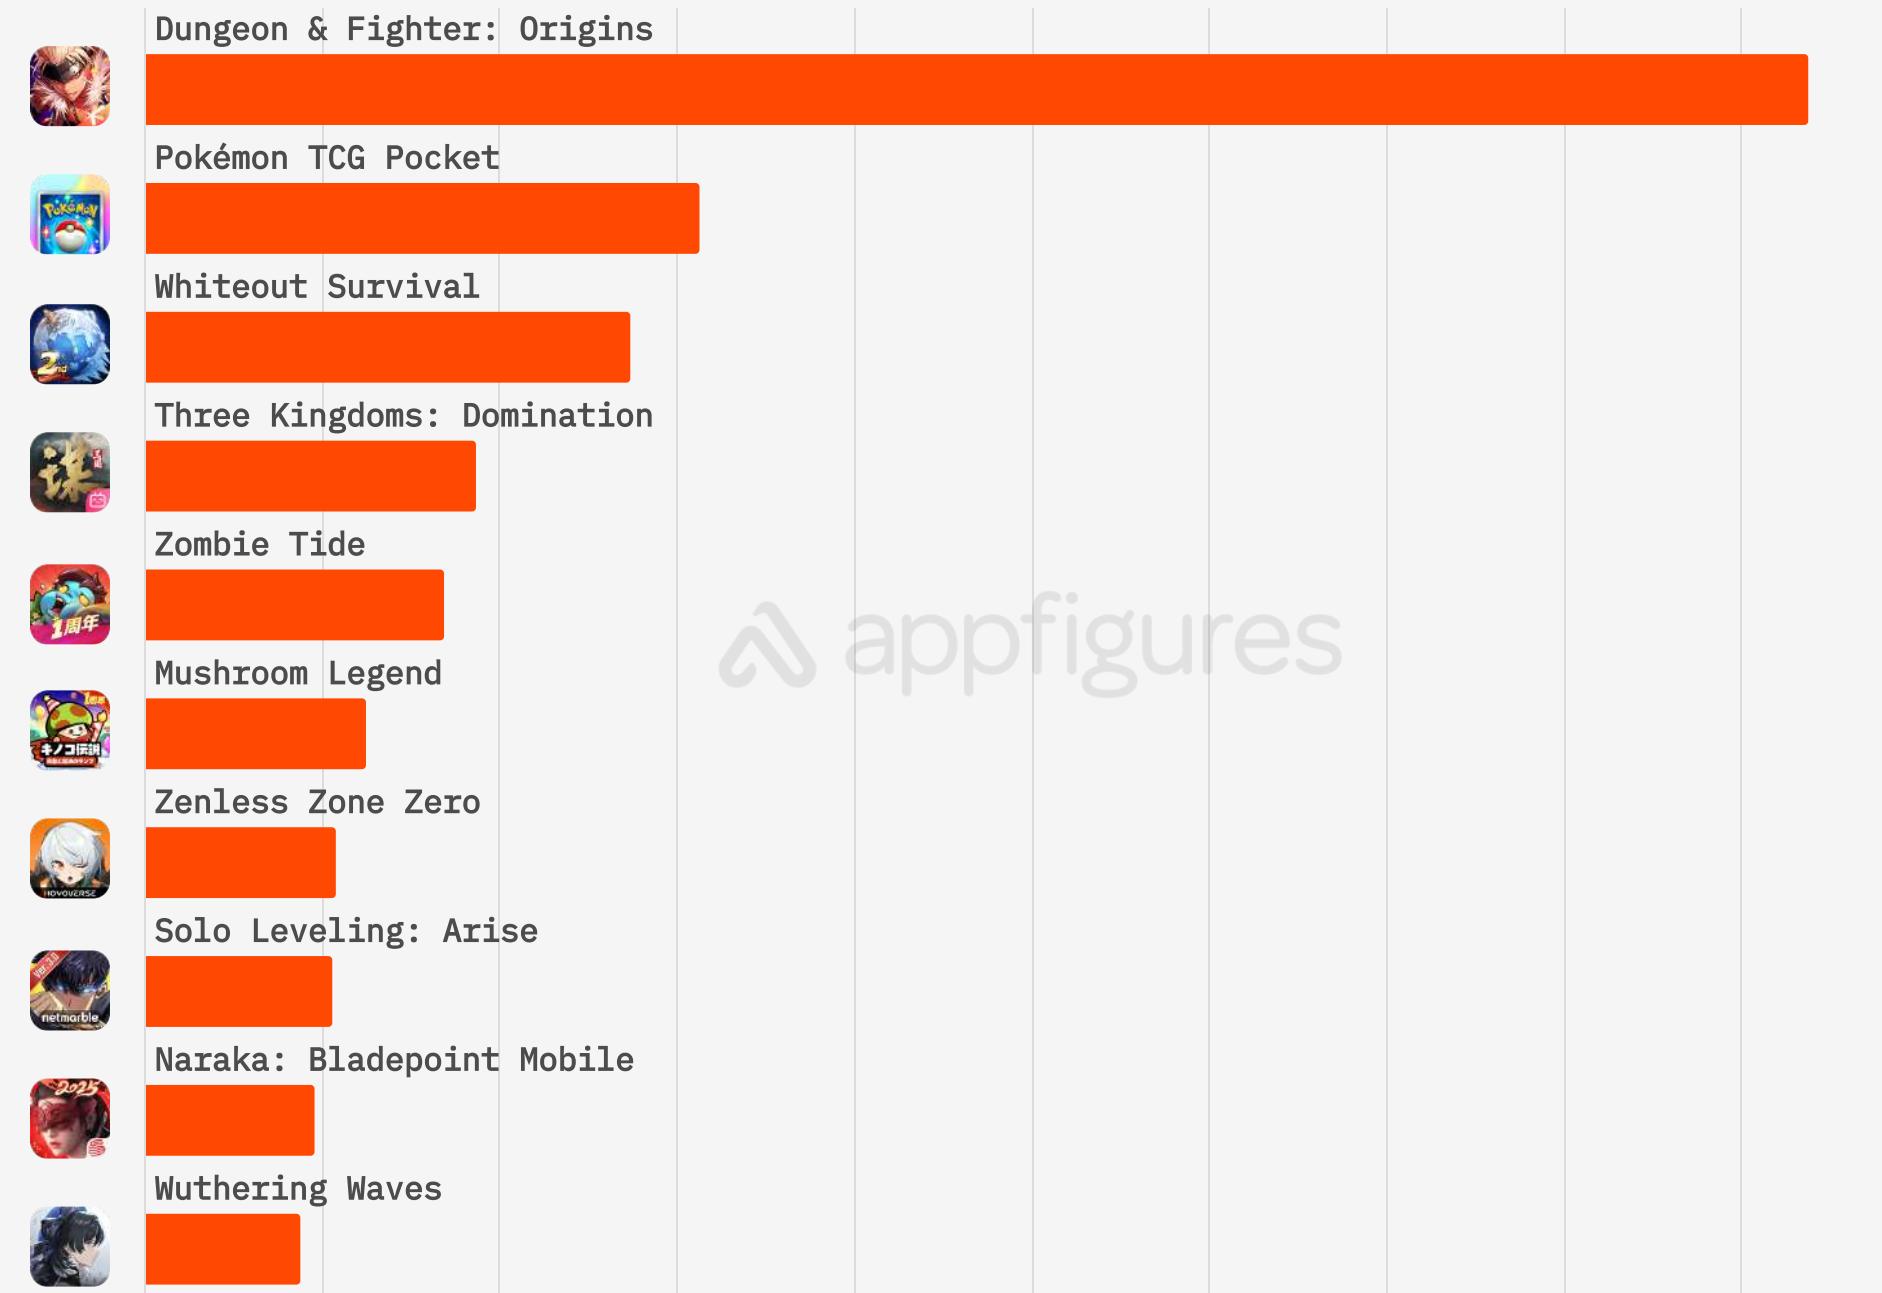

When it comes to which of the top 10 newest titles mobile gamers are devoting the vast majority of their spending to, **games from China (with eight) and Japan (with two) are far ahead of the pack** — and not just in their home markets.

At close to \$1B in spending, Tencent's Dungeon & Fighter: Origins does generate most of its revenue in APAC, it, along with **the majority of 2024's breakout hits have found devoted player bases in the West**.

Pokémon TCG Pocket is emblematic of this trend. It derives most of its income from the United States, ahead of Japan, which is closely followed by EU markets.

Mid-Core Games Account for Half of Top Earning Titles

Understanding the mobile games ecosystem starts with knowing that **app store categories don't tell the full story**. While important for placement, **the industry uses its own system of categories, genres, and subgenres** to track performance and spot trends.

For this report, **we've classified the top 1,000 earning mobile games of 2024** using a taxonomy widely recognized by developers. **The data shows Mid-Core titles – like Strategy and Shooters – make up half the list.** Casual games, including Puzzle and Lifestyle, account for nearly a third. The rest is split between Casino games at 11% and Sports & Driving titles at 7%.

Percentage of Top 1K Earning Mobile Games in 2024 by Category

Worldwide • App Store & Google Play • Jan '24 - Dec '24

Source: Appfigures Intelligence

Genre Analysis Reveals the Real Revenue Engines

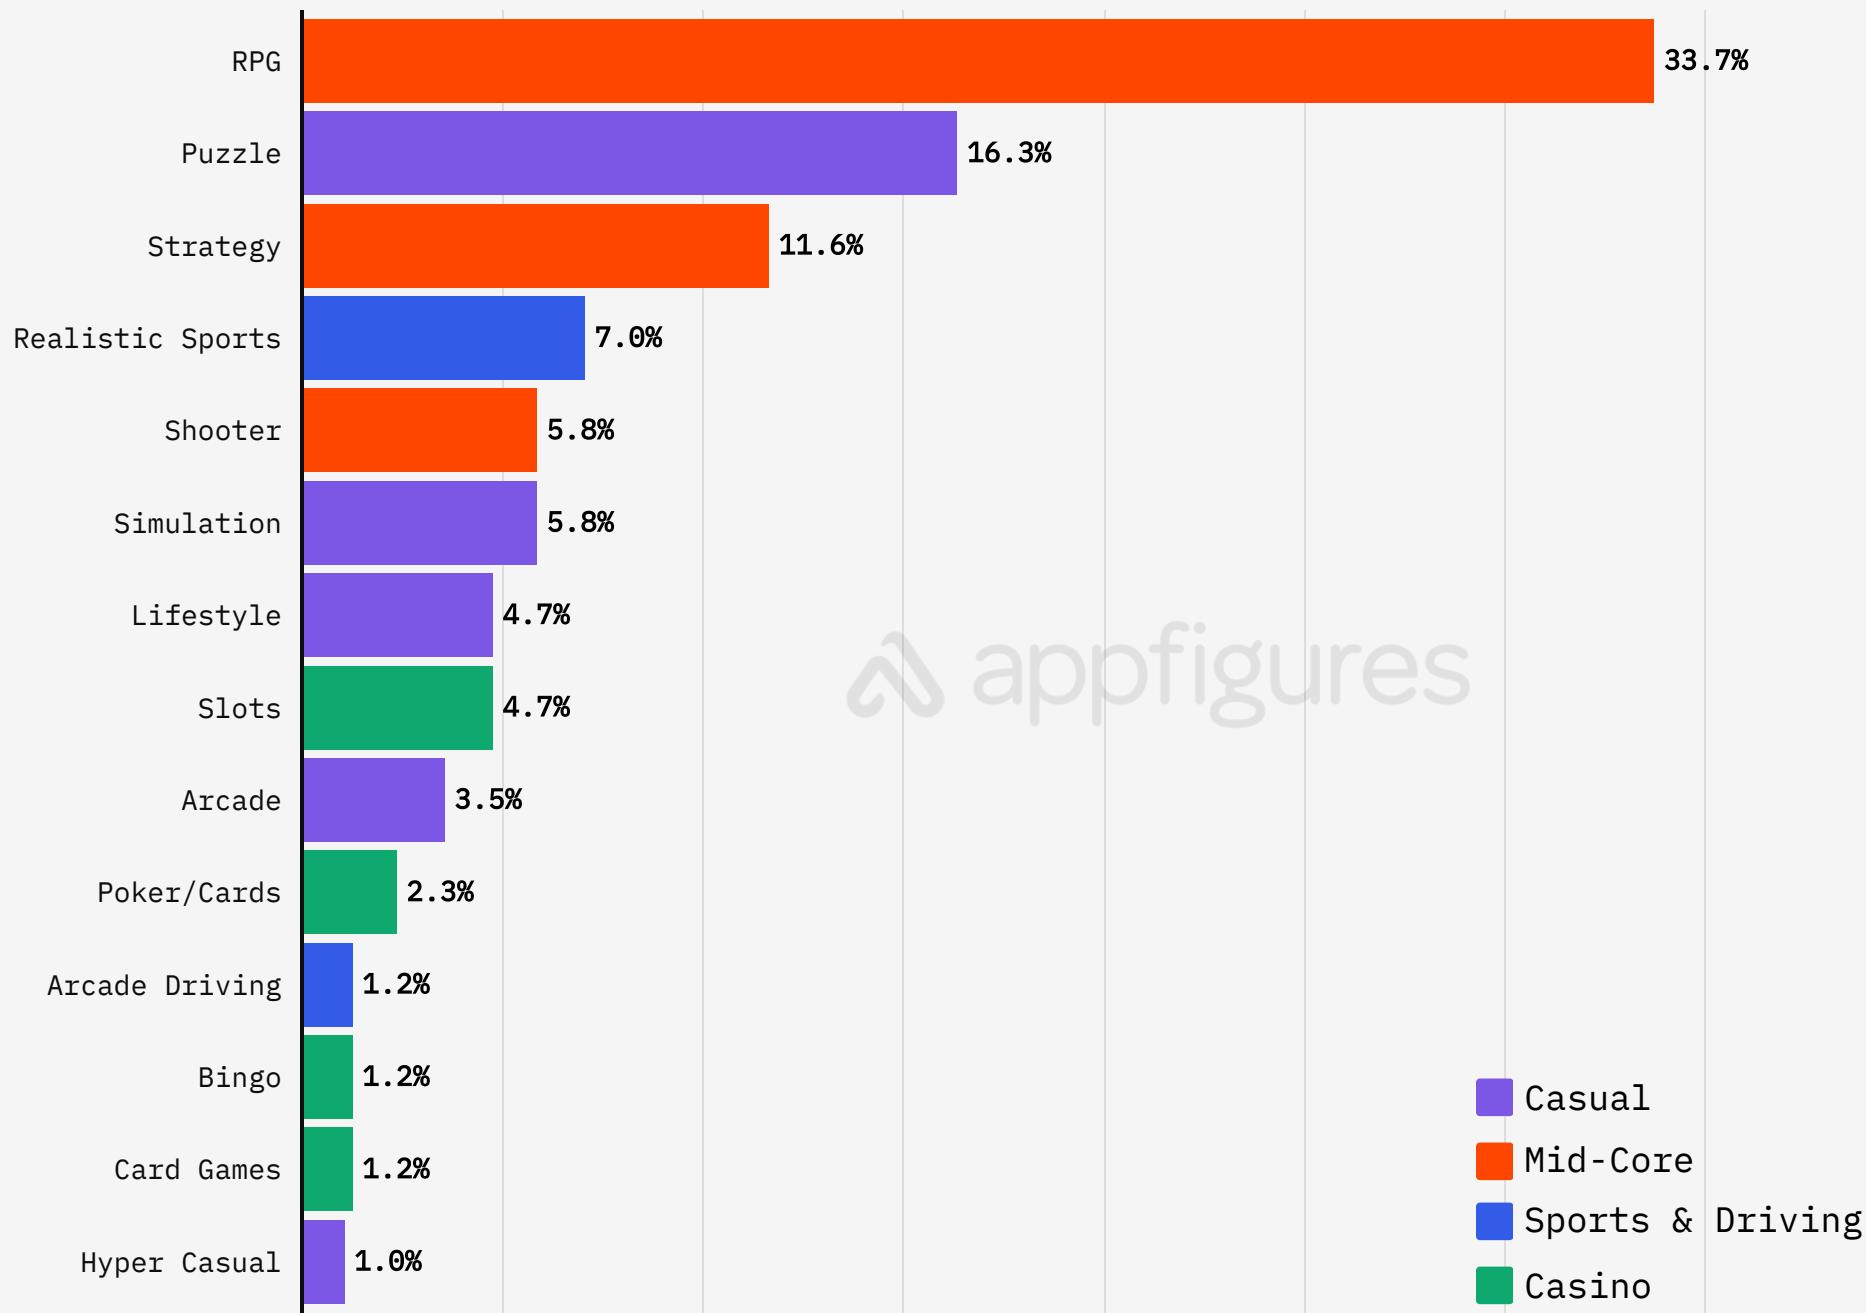

Looking one layer deeper into genre performance, it's clear why the Mid-Core category leads: **RPGs alone account for nearly 34% – or 340 – of the top 1,000 revenue-generating mobile games.**

Strategy, another Mid-Core genre, ranks third overall with just over 100 titles in the top 1K. Shooter games, which round out the Mid-Core trio, land in fifth place by volume.

Sitting between RPG and Strategy are Puzzle games, a Casual genre and major pillar of mobile gaming from the outset. Puzzle games make up 16.3% of the top 1,000, about half of RPGs' share, yet they far surpass the popularity of other Casual genres. **The data shows that just a few genres drive the bulk of mobile game revenue today.**

Subgenre Breakdown for Largest Genres by Number of Games in Top 1K

Worldwide • App Store & Google Play • Jan '24 - Dec '24

Each major genre – like the three largest shown here – breaks down into several subgenres. Within RPGs, for instance, we see more than eight subgenres represented in the top 1,000. Two lead the pack: MMORPGs (Massively Multiplayer Online RPGs) and Action RPGs, which account for 22% and 21% of the full list, respectively. This level of detail helps reveal what's really driving genre-level performance.

RPG

■ MMORPG ■ Action RPG ■ Idle RPG ■ Turn-Based RPG ■ Tower Defense ■ Survival ■ Puzzle RPG ■ Fighting ■ Other

Puzzle

■ Match 3 Puzzle ■ Board Games ■ Solitaire Mahjong ■ Word Games ■ Merge Games ■ Hidden Objects ■ Bubble Shooter ■ Trivia Games ■ Other

Strategy

■ Tactical Battler ■ 4X Strategy ■ Build & Battle ■ MOBA ■ Other

Subgenre Breakdown for Other Genres with Games in Top 1K

Worldwide • App Store & Google Play • Jan '24 - Dec '24

Outside the largest genres, few specific subgenres dominate. Most have only a handful of standouts. For instance, non-Casino Card Games are split between Card Battlers like Hearthstone and titles that don't fit neatly into a formal subgenre. Battle Royale games – like PUBG Mobile – still lead the charge among top performers in the broader Shooter genre.

Arcade

■ Shoot/Beat 'em Up ■ Platformer ■ Other

Lifestyle

04

Where Mobile Gaming Is Growing—And Slowing

Just as it's crucial to follow shifts in player taste, major releases, and how those impact popularity of the various categories, genres, and subgenres from year to year, it's key to keep tabs on where the data's showing emerging geographic and market-level opportunities are presenting themselves.

Markets with Greatest Year-Over-Year Consumer Spending Growth

05

Meeting Mobile Gamers Where They're At

There's determining what type of game to develop. There's identifying where to market it. Then there's how and to whom to market.

In this section, we look at tactics to get in front of desired audiences, drive adoption, and maximize budget in the process. User acquisition is getting harder, but that doesn't mean it isn't also becoming smarter.

Top Apps with Ads by Crossover Audience with High-Earning Games from 2024

Worldwide • App Store & Google Play • Jan '24 - Dec '24

Knowing which apps' user bases have the **highest crossover usage** with a game can offer crucial insight when deciding **where to allocate advertising resources**. For example, here's a look at 10 of the world's top games and their **complementary apps**.

	Game	#1	#2	#3	#4	#5	#6	#7	#8	#9	#10	#11	#12	#13	#14	#15
	Brawl Stars															
	Candy Crush Saga															
	Clash of Clans															
	Coin Master															
	Gardenscapes															
	League of Legends															
	Monopoly GO!															
	Pokémon GO!															
	Roblox Mobile															
	Royal Match															

See appendix for full application names.

Case Study: Supercell's Brawl Stars IP Team-Ups

Collaborations between mobile games and major IP from TV and movies to comics and fashion are nothing new. But in online multiplayer and live service games they shine, **boosting both player acquisition and spending**. Monetization through branded events has grown more sophisticated over time and is **now a core strategy in top titles**.

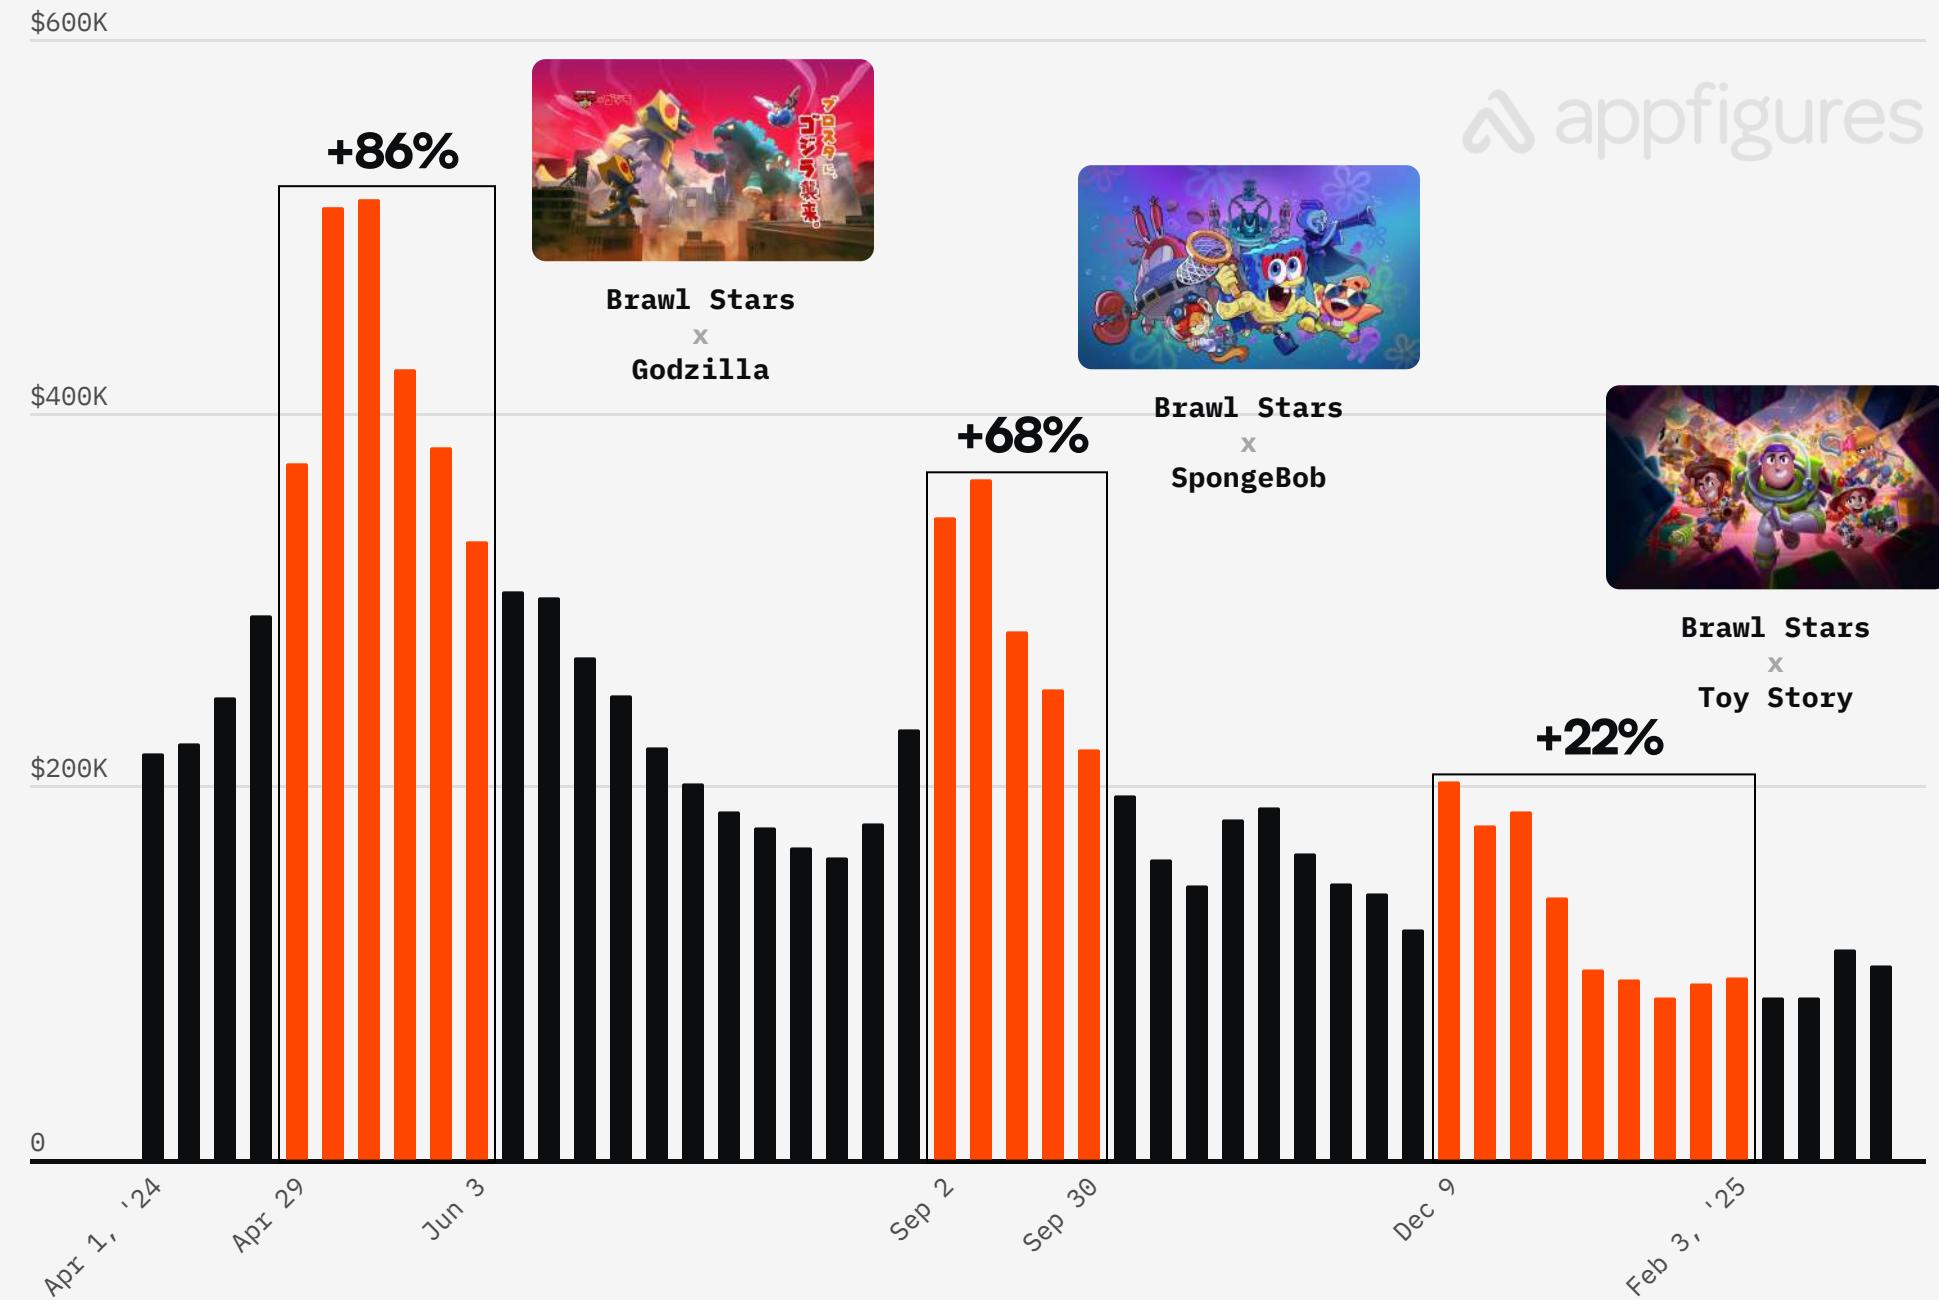

For example, **in early 2024 alone**, **Brawl Stars featured three IP crossovers** – Godzilla, SpongeBob SquarePants, and Toy Story – **each driving notable revenue spikes**.

Godzilla led with an 86% lift over the previous four weeks, SpongeBob delivered 68%, and Toy Story added 22%, underscoring the value of well-matched partnerships.

Impact of IP Crossover Events on Brawl Stars Player Spending

06

Learning from How Top Games Monetize

In our final section, we use data to answer questions around which types of in-game monetization are most popular in the current mobile games market, and how a mainstay of money making in apps, namely in-app advertising, has seen changes in the mix of networks and their corresponding SDKs used over time.

How the Top Mobile Games Make Their Money

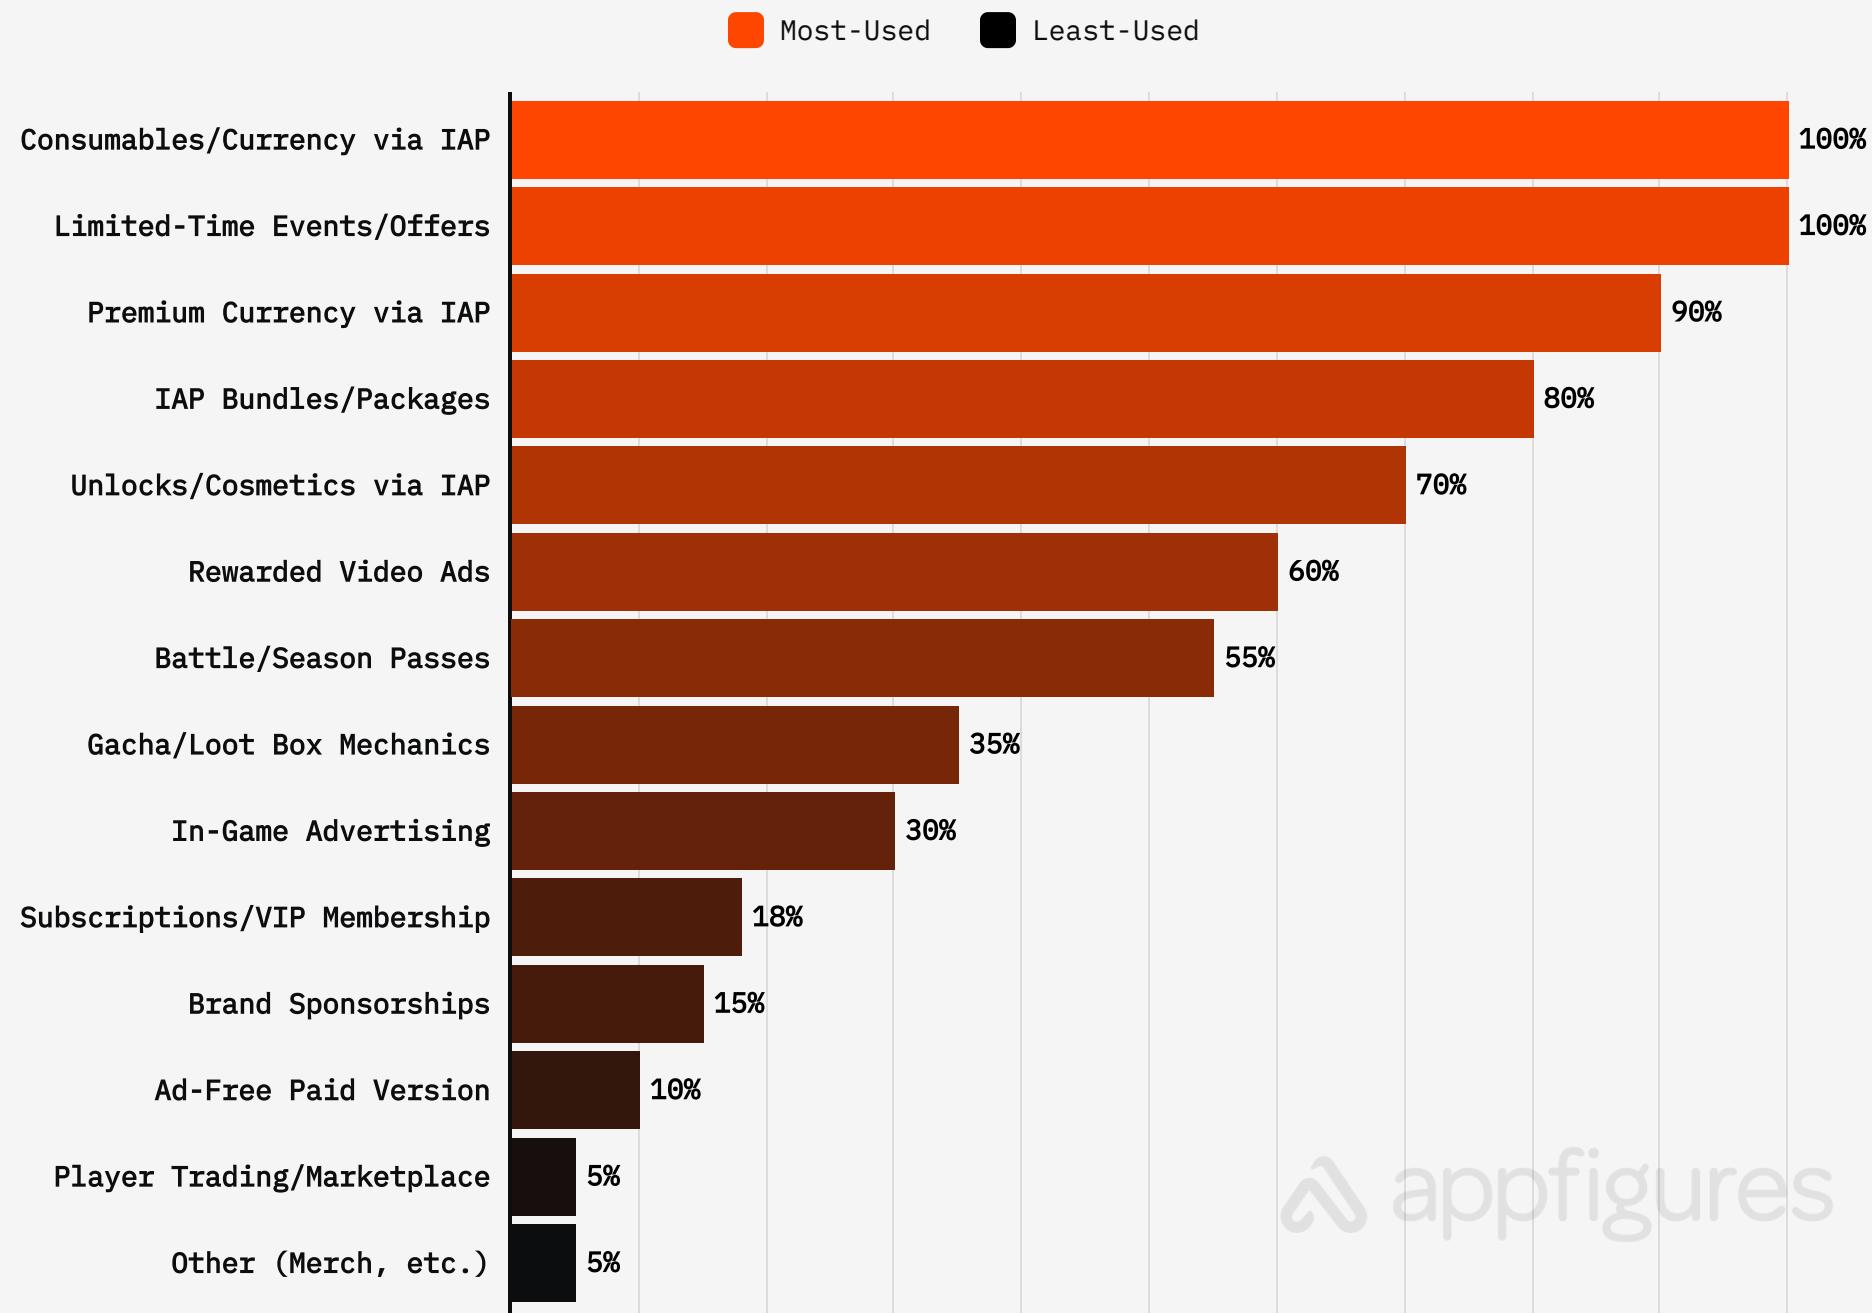

The mechanisms mobile games rely on to optimize their monetization have **grown in variety and sophistication over time**, while some have become "must-have" mainstays. We looked at how the **top 500 earning mobile games worldwide in 2024** monetized and the results reveal some clear standouts.

Two types, **Consumables/Currency** and **Limited Time Events/Offers**, were present in all of them. Others, including Premium Currency, IAP bundles, and Unlocks/Cosmetics were present in **at least 70%** of the top 500 titles.

These findings can be helpful when working to identify **which monetization types are necessary and which to experiment with**.

Monetization Type by Presence in Top 500 Earning Mobile Games for 2024

Worldwide • App Store & Google Play • Jan '24 - Dec '24

All Ad Networks Claim They're the Biggest—These Really Are

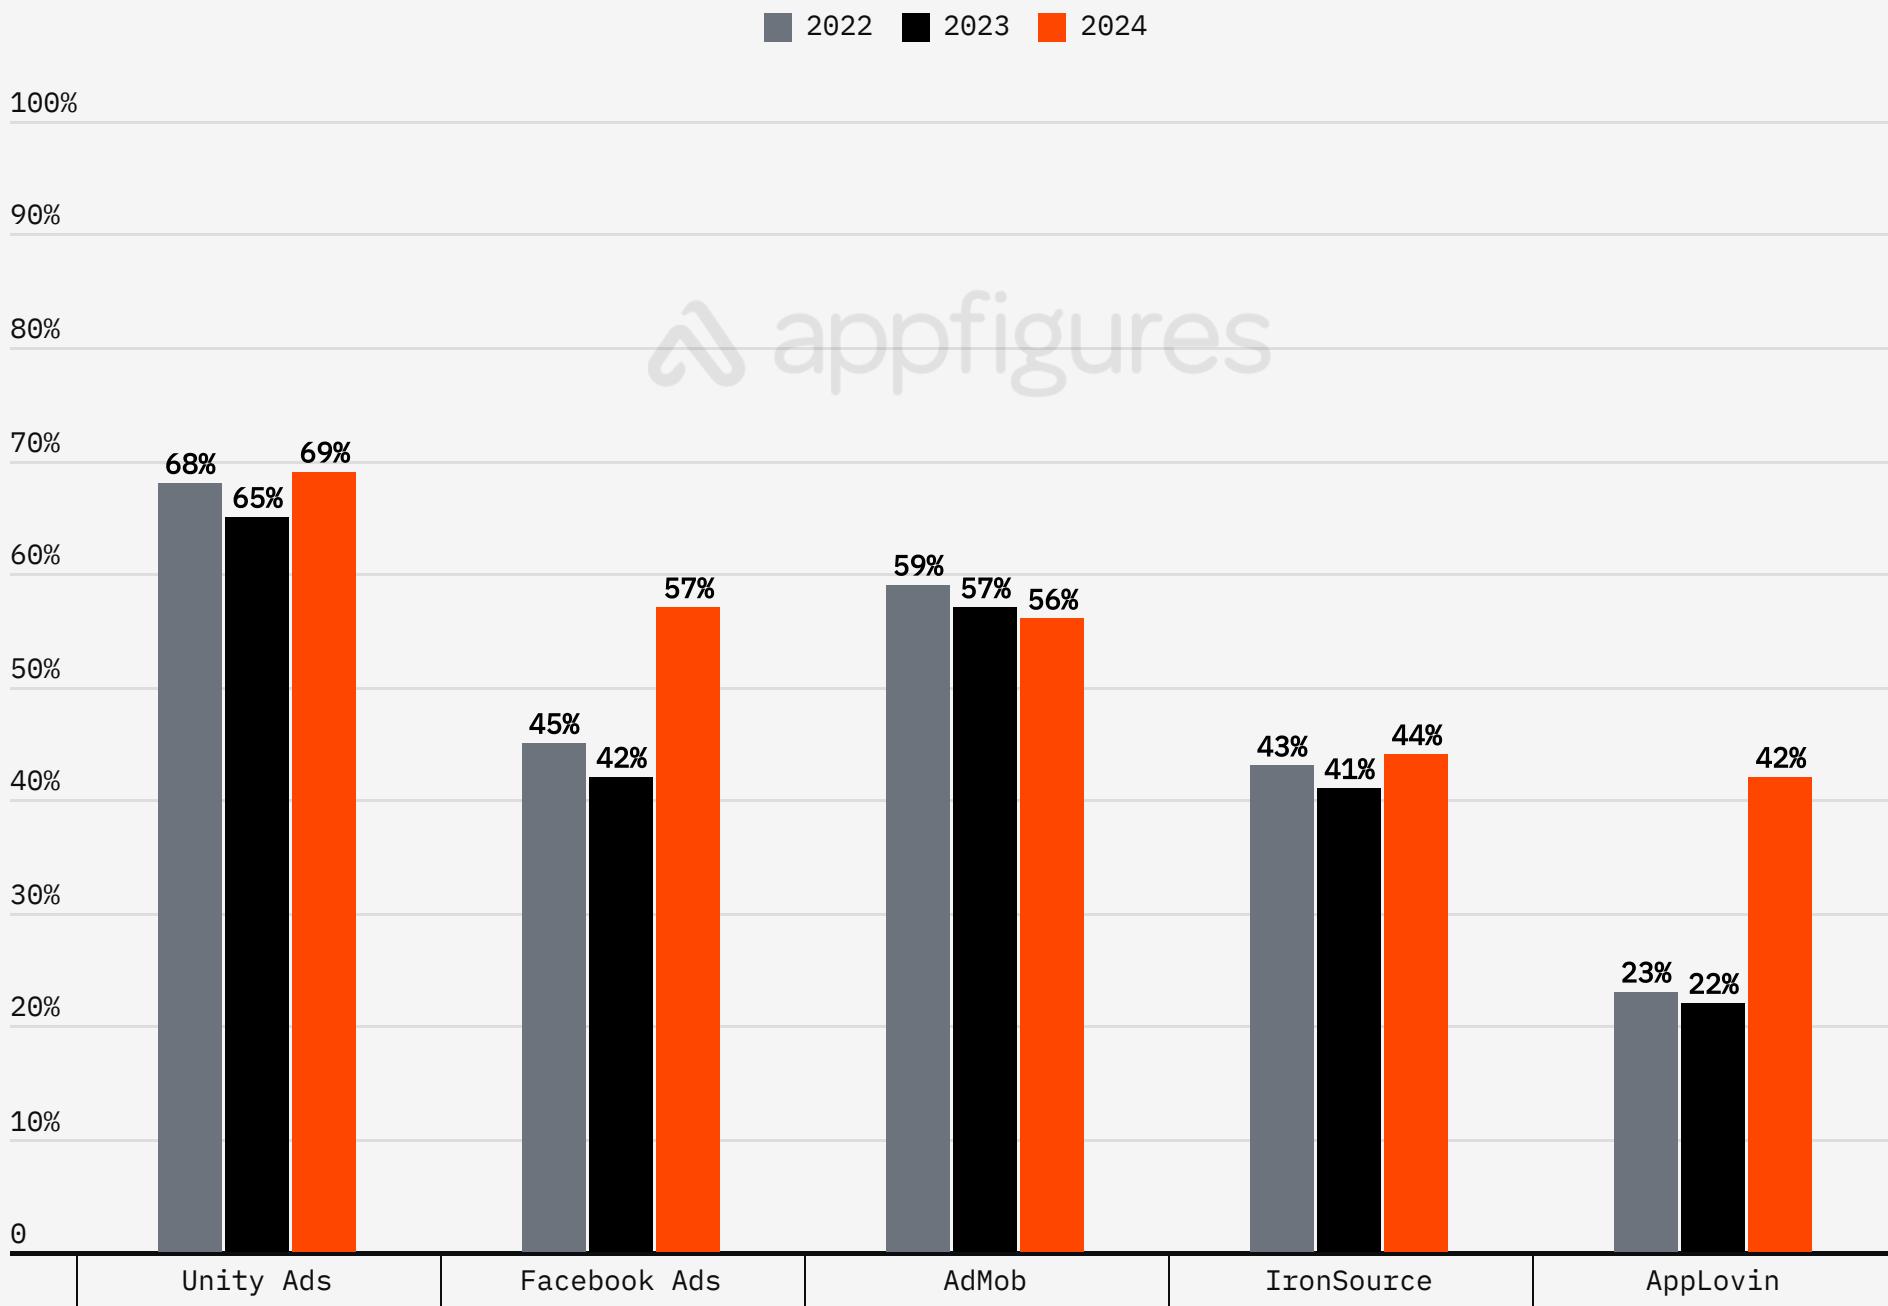

Another core option for monetization in free-to-play games is in-game advertising, but knowing which ad networks the top titles are tapping into — and how they've changed over time — can be key to realizing the best results.

2024 Ad Network Top 10

Ad Network	Adoption %	From 2023
Unity Ads	69%	↑
Facebook Ads	57%	↑
AdMob	56%	↓
IronSource	44%	↑
AppLovin	42%	↑
Vungle	25%	↓
Supersonic	18%	↑
Fyber	13%	↑
Pangle	10%	↑
Mintegral	9%	↑

08

Methodology

Methodology & Technology: How We Built This Report

Custom Category & Genre Classifications

Analysis in this report is based on a custom classification of the top 1,000 earning mobile games, worldwide, in 2024. Each app was assigned a games industry-aligned category, genre, and subgenre, independent from and more granular than categories used on the App Store or Google Play.

SDK Identification

Appfigures downloads and scans every free iOS app from the App Store and Android app from Google Play when they're released or updated. We then use a human-assisted identification process to get a list of all installed SDKs.

Countries Included

Appfigures estimates cover 100 countries selected by scale, across Africa, Asia, Europe, North America, South America, and Oceania. They include a diverse representation of key markets, including India, Brazil, Australia, and Canada, alongside the likes of China, the United Kingdom, and the United States.

App Store Fees and Commerce Payments

All revenue estimates in this report are presented as gross consumer spending in apps before Apple and Google's platform fees (typically 30%). Only revenue from in-app purchases (IAP) that is processed through the app stores is included; Web purchases, in-app advertising, and other sources are not.

Estimated Downloads and Revenue

Appfigures utilizes cutting-edge proprietary Machine Learning and Deep Learning AI models trained using billions of data points to produce highly accurate estimates of first-time downloads and revenue from mobile apps on a per country and day level. Our estimates have been validated by thousands of data owners.

Legal Information

All original content in this report is copyright ©2025 by Appfigures. App icons are property of their respective owners and are used for the purpose of editorial commentary only.
